

Memo – Common Sense?

Subject: Inoculation Bullshit – What will fictional people accept?

Disclaimer

This entire document is fictional and just like the minutes of many meetings you went to before lockdown. You remember when you scratched your head and thought for a moment, I was there and I don't recall agreeing to that?

Introduction

So there are people who despite watching movies about scam artists, enduring hours of documentaries and consumer programs, not to mention news articles and anecdotes from friends they will still fall for scams. They have been inoculated, but their bullshit immune system does not really work. Where as other folks who even if they have not been exposed to the mass media inoculations, they will still sense when someone is trying to scam them. They have a healthy bullshit immune system.

Thinking.....

So if you have a healthy immune system and you endure a disease, building a lifelong immunity why do you need a vaccine? If you have a compromised immune system that does not work properly, even if your body is shown what the disease looks like, what can it do if it's immune system does not work properly? So what is the point in showing the body a vaccine any more than showing scams to people who don't have a properly functioning common sense?

Here's a real life example to test you.

If you die within 28 days of a positive covid test, it was the virus that did it.

If you die within minutes, hours or days after a vaccine, it was just a coincidence.

If you get the disease the vaccine was supposed to be effective against, well you would have got it worse if you did not have the vaccine!

If you get a side effect that is worse than the disease, well you must have had an underlying problem.

Prove you are not infected?

You prove the virus has been isolated and it meets Kochs postulates.

Of course in the real world governments and big corporations are working together because they care about you. How could anyone believe that, they are in it for the money, power and control?

Praise the dear leader.
